Catalog is a very useful feature for SEO purposes to list all your courses, tests and live classes in a public marketplace setup allowing search engines like Google to index it. Guests can view the courses offered before signing up. Your customer can also purchase paid courses and create account at the same time. In addition to public catalog, you can also enable catalog available for logged in users.

Enabling Catalog for guests:

Go to "Account & Settings" --> "Login page settings", and scroll down to the bottom of the page. Enable the catalog that you want to present to guests and save your settings.

Catalog settings

Enable Course Catalog

Enable Test Catalog

Enable Class Catalog

Save

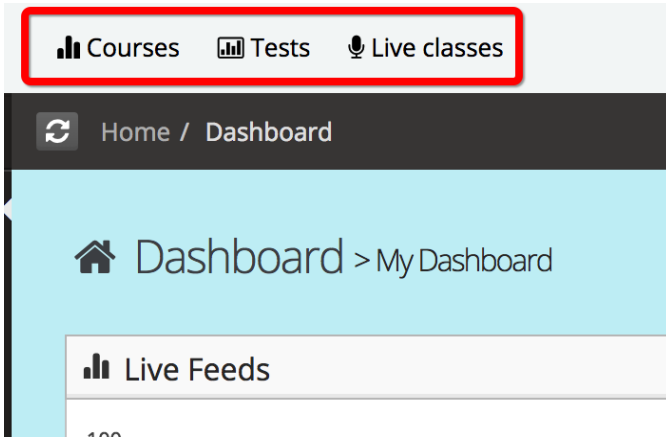

Now, when you create a course, test or live class you'll see "List in catalog" option is available. This makes it easy to assign individual items to the catalog.

? **List in Course Catalog**

Enabling Catalog for logged in users:

You can also enable the catalog menu available for logged in users. This is extremely useful to allow students to browser what you offer and buy selected items.

To enable this option, go to "Account & Settings" --> "Basic settings" and scroll all the way down to catalog settings option. Simply check the menu items you want to enable and save your settings.

Catalog settings for logged in users

- Enable Course Catalog for logged in users
- Enable Test Catalog for logged in users
- Enable Class Catalog for logged in users

Save

To change the menu font color, go to "Account & Settings" --> "Look & Feel" and edit the menu text color.
